INDONESIAN SUGAR RESEARCH JOURNAL

Volume 1, Issue 1, June 2021

Indonesian Sugar Research Journal (ISRJ) originated from the printed version of the Majalah Perusahaan Gula (MPG) which was first published in 1965. Starting in 2021 the ISRJ was published in electronic and printed versions. ISRJ is compiled from the results of scientific and applied research or outcome reviews with selected topics.

Indonesian Sugar Research Journal published by the Indonesian Sugar Plantation Research Center, Pasuruan, Indonesia.

Indonesian Sugar Research Journal contains original articles of research results, findings, and ideas from various fields of science, especially fields related to sugar plantation and its processes, both from researchers, lecturers, students, and related parties.

The scope of the Indonesian Sugar Research Journal is: cultivation, agribusiness, plantation management / management of sugar and sweetener crops, processing of sugar products and processing materials, post-harvest technology and basic research related to sugar and sweeteners.
